

# When you have a ship at sea **reliable, accurate** **and timely status reports** are essential

## **Marine tracking, communications, security and more**

SEABAND's MVM—Marine Vessel Monitoring system is an affordable, proven solution of monitoring vessels of all kinds. Made in compliance with Solas XI-2/6, the MVM's World-wide Data Flow and Global Positioning Satellite capabilities protects, tracks, alerts, reports and communicates to and from any where in the world.

### **Reliably effective**

The SEABAND MVM employs redundant communications of satellite, microwave and RF technology to ensure always-on, world-wide reporting. It resists shock, dust, humidity, pressure, temperature extremes and liquids and is completely self-contained for maintenance-free, worry-free operations.

Piracy, weather conditions, equipment failure, delays they are all threats to your marine vessel operations and to your ability to have the job done right. **Reduce all risks with SEABAND's MVM** 

Patent Pending.

## REPORTS

Reports position, speed, heading, temperature, weather and more. Provides custom geo-fencing reports and alerts (entry and/or exit of specific areas), as well as real-time and historical details of all activities and locations of the vehicle as well as entry to and exit from secure areas.

## TRACKS

Any type of marine vehicle, of any size, purpose and configuration can be monitored with SEABAND's MVM. Military, police, industrial, fleet, and private ownership vessels can all enjoy the protection and monitoring of the MVM.

## ALERTS

Proximity alerts, heading alerts, geo-fencing alerts, exposure to various substances, breach alerts, news alerts, and a host of additional programmable alerts keeps your vessels, and your command personnel, informed and prepared to act.

## PROTECTS

Protects entire fleets, single vessels even individual decks, rooms and containers through MVM's active sensor technology. Records and announces area breaches, door ajar, attempts of tampering, power outages and more, noting details such as time, ship board activities and ship position.

## COMMUNICATES

Continuous, real-time, two-way communications by voice, text, encrypted data, emergency beacons to and from anywhere in the world.

*Container ships, navy vessels, coast guard, cruise ship, fishing boats, yachts, speed boats...*

The SEABAND MVM is built to the highest level of reliability that exceeds U.S. Government Military requirements. Created by SEABAND, a leader in military, communication and monitoring devices.
